

Role: Senior Magento Developer / Team Leader

The Company: Ego Shoes

A leading ladies fashion footwear company based in Manchester provides on-trend and celebrity inspired shoes to shoeaholics worldwide using latest web technologies!

Having launched 4 years ago, the company has enjoyed exponential sales growth and has dressed some of the biggest bloggers and celebs i.e. Kendall Jenner, Winnie Harlow, Carlibel, Little Mix and Bella Thorne.

If you have a technical background and have an entrepreneurial spirit, want to have first hand impact on the business using the latest technology then this role will be a right fit.

Roles & responsibilities

We are platformed on Magento 2 EE on Magento Cloud. We have built a multi-talented remote development team based in India that work with us closely. This team will be lead by you and you will have the pleasure of working with them on a mixture of ambitious projects to maintenance projects. This role will involve a mix of technical hands on (coding/critical bug fixing) and non-technical (user story writing).

- Take ownership of small projects from design, implementation and testing.
- Identify, communicate, and implement opportunities for improvement in applications development.
- Communicate regularly in daily standups to update on project progress and blockers.
- Work with the team to give estimates on project user stories and plan a roadmap of projects to deliver by.
- Liase with customer service in regards to any technical issues/bugs.
- You have the responsibility of reviewing Pull requests before they are released and ensuring smooth deployments to staging and production servers.

You & your skills

- Understanding of user stories and estimation.
- Good communications of technical jargon to business.
- Experience with modern PHP frameworks such as Laravel, Symphony or Magento.
- MySQL, including EAV data structures.
- Experience with JavaScript frameworks - jQuery and/or Prototype.
- Would be great if you have experience in Magento Frontend development.
